Thanks, Mary. We don't have any comment.

The Corps role will not be strictly regulatory. For modeling hydrology, DOI/C should consult with my District's Hydraulics and Hydrology Branch. We've been modeling the delta for years and have significant info to bring to the table.

MJ

Subject: Task force documents

On May 3, the Secretaries of Interior and Commerce issued a letter that created a task force to develop a strategy to complete a single integrated biological opinion for the BDCP and CVP operations. We have prepared a draft strategy and plan to release it for public consideration on June 9. One of the steps in the strategy is working with EPA and USACE to define your agencies roles in this process and involve your staff, as appropriate. Because working with your agencies is an important part of this strategy, I wanted to share the document with you in advance of its wider release.

Please contact me or David if you have any questions.
